Clock tower research	<p>We talked about researching the clock and that we will work with a local historian who will help us. We went for a walk outside around the walled garden to look at where the clock is to be situated. The children did not like the idea of the tower being in the middle of the grass. The children suggested it would be better located on top of the existing corner tower because it would be in a more prominent position for the whole school and wouldn't take away one of our grass areas. They would also like to design a plaque with historical information and photographs to go outside or on the tower so everyone can see the historical information. The children would like the clock tower to work, therefore we would like to research the cost of having it restored.</p>
Clock tower - drawing session	<p>The council has been invited to an open session in the Herons classroom on Friday lunchtime to come and draw designs for the clock tower - we will be using old photographs to aid our designs.</p>
